Education

National University of Modern Languages
Bachelor of Computer - Computer Science

Feb 2020 - Feb 2024
Islamabad, PK

Technical Skills

Languages: HTML5, CSS3, JavaScript

Frameworks & Tools: Express.js, React.js, Redux, Tailwind CSS, MongoDB, Git, Netlify, VScode, Node.js

Relevant Courses: Data Structures & Algorithms, OOP, DBMS, Web Programming

Experience

Skyscrapers Pvt Ltd | Frontend Web Developer

Feb 2024 - May 2024

- During my tenure as a Front-end Developer Intern at Skyscrapers, I had the opportunity to apply and expand my knowledge of web development principles and working closely with the development team.
- Additionally, I had the privilege of working with React, enhancing my skills in modern front-end frameworks.
- This internship not only provided me with practical experience but also equipped me with the necessary skills and confidence to excel in the field of front-end development.

Projects

Skyscrapersnow.com | HTML5, CSS3, PHP, JQuery, Bitbucket | [Project Link](#)

- Developed a fully **responsive website** for Skyscrapers.pvt.Ltd, **redesigning** their existing site for a **modern look**, ensuring **cross-device compatibility** and **optimized performance**.
- Collaborated with team members to implement **high-fidelity Figma designs** into clean, efficient code, enhancing the **user experience**.

Mytruetraffic.com | HTML5, CSS3, JQuery | [Project Link](#)

- Developed the homepage of **MyTrueTraffic** using **HTML5, CSS3, and jQuery**, ensuring a structured design with a seamless **UI/UX**.
- Collaborated with **Skyscrapers Pvt. Ltd.** to align the project with business goals and branding.

Password Guessing Using Machine Learning | Final Year Project (FYP)

- Developed a password guessing & similarity evaluation system using **LSTM RNN**, analyzing leaked password datasets by **length, character composition, and syllable count** to enhance security.
- Designed a **Streamlit-based front-end** for easy interaction & visualization of password patterns, improving security insights.

Developed a Personal Portfolio by using React.js | JavaScript, React.js, CSS3 | [Project Link](#)

- Built a personal portfolio with **React.js, JSX, and CSS**, showcasing skills, education, and projects with a **responsive UI**.
- Deployed on **Netlify**, optimizing **performance, accessibility, and design** for an engaging user experience.

Weather App with API Integration | JavaScript, React.js, Weather API, CSS3 | [Project Link](#)

- Built a **Weather App** using **React.js** with a **Weather API** for real-time **temperature, humidity, and forecasts** worldwide.
- Designed a **responsive UI** with **dynamic search** and **CSS3 styling** for a smooth, mobile-friendly experience.

Development of a Rentify a car rental Application utilizing MERN Stack (IN PROGRESS) | JavaScript, React.js, Node.js, Express.js, MongoDB, CSS3 | [Project Link](#)

- Developed a car rental app using the **MERN stack**, enabling seamless **booking, vehicle management**, and **real-time availability** with **secure user authentication** in **Express.js, MongoDB** for rental history, and a responsive **React.js** UI.

Development of a DevTinder Application utilizing MERN Stack (IN PROGRESS) | JavaScript, React.js, Node.js, Express.js, MongoDB, CSS3 | [Project Link](#)

- Developed a **DevTinder** app using the **MERN stack**, enabling developers to connect through a **matchmaking system** with **secure user authentication** via **Express.js** and **MongoDB**, ensuring **data privacy** and an optimized, **responsive UI** with **CSS3**.

Development of a E commerce Application utilizing MERN Stack (IN PROGRESS) | JavaScript, React.js, Node.js, Express.js, MongoDB, CSS3 | [Project Link](#)

- Developed an E commerce app using the **MERN stack**, with **secure user authentication** via **Express.js** and **JWT** and **MongoDB**, ensuring **data privacy** and an **attractive UI** with **CSS3**.
